SUMMARY

UI/UX Product Designer with over 3 years of experience in creating user-friendly mobile applications and data-rich web platforms. Proficient in overseeing complete design processes in Figma, including the development of scalable design systems and ensuring compliance with accessibility standards (WCAG). Holds an MS in Digital Marketing, emphasizing UX strategy and Conversion Rate Optimization (CRO) to transform user behavior insights into significant product growth.

EDUCATION

Sacred Heart University, Fairfield, CT

January 2026

Master of Science in Digital Marketing

GPA 3.6/4.0

Coursework: Web Design from Marketing Perspective, AI for Business, Customer Experience Management (CXM), Digital Marketing Capstone, Social Media Marketing, Digital Advertising, Marketing Analytics.

K.V. Pendharkar College (University of Mumbai) – Mumbai, India

May 2021

Bachelor of Commerce (B.Com)

Coursework: Information Technology in Business, Principles of Marketing, Business Communication, Commerce & Business Management

SKILLS

Design Tools: Figma (Auto Layout, Component Libraries, Advanced Prototyping), Adobe XD, Photoshop, Illustrator.

UX Research & Design: Wireframing (Low-to-High Fidelity), User Flows, Information Architecture, Responsive Web Design, Cross-Platform Consistency, Mobile App Design.

Design System & Strategy: UI/UX Design Systems, Reusable Components, Grid Systems, Customer Experience (CX) Design, Interaction Details, Conversion Rate Optimization (CRO).

Software & Collaboration: Jira, Agile/Scrum Methodology, Cross-functional Collaboration, Design-to-Dev Handoff, Technical Documentation

WORK EXPERIENCE

UI/UX Product Designer – Swasthya Lifescience Pvt. Ltd., Mumbai, India

Feb 2023 – Jul 2024

- Designed intuitive wireframes and interactive prototypes in Figma for a patient-facing healthcare mobile app and Web portal, ensuring seamless appointment booking and medical record access.
- Structured data-dense internal dashboards for clinical researchers and healthcare professionals (HCPs), improving complex medical data visualization and information architecture.
- Integrated accessibility standards (WCAG guidelines) into design patterns, optimizing color contrast and font scalability to enhance usability for elderly and diverse patient demographics.
- Translated product and business requirements into optimized user flows, responsive screen layouts, and reusable component libraries to maintain strict cross-platform consistency.
- Partnered closely with engineering and development teams during handoffs, providing detailed interaction specs and design documentation to ensure precise, pixel-perfect implementation.

Jr. UI/UX Designer – Accenture, Mumbai, India

May 2021 – Apr 2022

- Collaborated with senior designers to revamp a B2B ordering platform for a Fortune 500 FMCG client, optimizing search and checkout flows to enhance user engagement.
- Built and managed a component library within Figma, creating 30+ reusable UI elements ensuring strict design-to-code consistency across the platform.
- Translated complex requirements into high-fidelity wireframes and interactive prototypes for weekly client alignment and feature reviews.
- Facilitated smooth developer hand-offs by thoroughly documenting design specs, redlines, and assets, minimizing production friction.

UI/UX Design Intern – Xarka AI Technologies Pvt. Ltd., Mumbai, India**Jun 2020 – Apr 2021**

- Designed intuitive user interfaces for websites, mobile applications, and internal analytics dashboards across multiple client projects.
- Created low-to-high fidelity wireframes and interactive layouts in Figma, converting raw product requirements into structured, clean designs.
- Supported engineering teams during design implementation, ensuring accurate asset delivery and maintaining visual integrity in the final product.

PROJECTS

Digital Marketing Capstone: Bigelow Benefits Product Optimization**Sacred Heart University**

- Conducted competitive analysis and evaluated user journeys to optimize e-commerce product content, reducing digital friction points across the platform.
- Analyzed structured datasets and user behavior trends using Microsoft Excel to design detailed customer journey maps and improve metadata accuracy.
- Formulated data-driven content strategies and KPI forecasts, providing actionable recommendations to enhance product visibility and conversion rates.
